

BEFORE THE STATE ENGINEER OF THE STATE OF UTAH

IN THE MATTER OF CHANGE APPLI-)
)
CATION NUMBER 55-11300 (a21878))

MEMORANDUM DECISION

Change Application Number 55-11300 and 55-11316 (a21878) in the names of Extension Irrigation Company and Central Utah Water Conservancy District was filed on February 2, 1998, to change the point of diversion of 20.00 cfs, of water evidenced by Paragraph 61(c), Page 52 and Paragraph 64(h), Page 53A, Provo River Decree, Civil Number 2888. The water has been diverted from the Provo River and utilized to irrigate 800.00 acres of land and for domestic and stockwatering needs.

Now it is proposed to divert the 20 cfs as heretofore and/or at Jordanelle Reservoir Dam located North 698 feet and East 439 feet from the S1/4 Corner of Section 31, T2S, R5E, SLB&M. Subsequently, the water will be rediverted from the Provo River at the following two locations: (1) Wasatch Canal, North 2300 feet and West 1020 feet from S1/4 Corner of Section 7, T3S, R5E, SLB&M; (2) Timpanogos Canal, North 151 feet and West 217 feet from the S1/4 Corner of Section 31, T2S, R5E, SLB&M. The water will be used to continue irrigation of 800.00 acres and to provide for fish culture, stream enhancement and a safeguard against downstream impairment.

Notice of the change application was published in The Wasatch Wave on February 11 and 18, 1998. Letters were received from Midway Irrigation Company, North Field Irrigation Company, Provo Reservoir Water Users Company, Metropolitan Water District of Orem and Provo City. Concerns are expressed that if the change application is implemented, return flow patterns may not be adequately replicated through simulation, and flows of the Provo River will be sufficiently altered to cause the detriment of their water rights. Provo River Water Users Association filed a protest stating that operation pursuant to the change application should be under the direction and control of the Provo River Commissioner and that approval of the change application cannot grant any instream water right. A protest submitted by Provo River Canals Commission asserts that approval of the change application would be an infraction of the Provo River Decree, would violate the State Engineer's "Water Distribution Plan for the Utah Lake Drainage Basin", and would interfere with the protestant's decreed rights.

A hearing was conducted May 6, 1998, in the Visitor's Center at Jordanelle State Park. The applicant's consultant presented a management plan to demonstrate how other rights would not be impaired. Spokespersons for the protestants reiterated their concerns.

The State Engineer has reviewed the change application, protests, proposed project operation and other pertinent issues. He has noted that the change application essentially involves a change in point of diversion. Irrigation of the same acreage will persist; hence, there should be no additional depletion of water from the Provo River drainage. Since there is no change in place of use, the State Engineer does not believe the Provo River Decree, Civil Number 2888, would be violated, specifically, Paragraph 116, Page 72. More efficient irrigation practices should make

flows available that can be managed to simulate historic conditions. Proper use of Jordanelle Reservoir can generally ameliorate circumstances on the Provo River system. Details of operation pursuant to the change applicant cannot be precisely defined at this time; an interim trial operation is needed. All decisions regarding operation must be made by the State Engineer/Provo River Commissioner. Regarding instream flow, Section 73-3-3 of the Utah Code Annotated, 1953, prohibits these applicants from acquiring such a water right. Finally, the State Engineer has utilized an irrigation diversion allowance of 3.00 acre-feet per acre for the upper Provo River drainage which quantifies the original right to be 2400.00 acre-feet ($3.00 \times 800 = 2400.00$); however, the water rights for the Extension Irrigation Company have late priorities (fourteenth and seventeenth Class, as defined in the Provo River Decree) and water can be diverted by the company only when rights with earlier priorities have been fully satisfied.

In evaluating the various elements of the underlying rights, it is not the intention of the State Engineer to adjudicate the extent of these rights, rather to provide sufficient definition of the rights to assure that other vested rights are not impaired by the change and no enlargement occurs. If, in a subsequent action, the court adjudicates that this right is entitled to either more or less water, the State Engineer will adjust the figures accordingly.

If it, therefore, ORDERED and Change Application Number 55-11300 (a21878) is hereby APPROVED subject to prior rights and the following conditions:

1. No instream flow right is granted.
2. Total annual diversion is limited to 2400.00 acre-feet and irrigated acreage shall not exceed 800.00; nevertheless, because of the late priorities of the rights, the quantity of water divertable in a particular season may be less and the allowed amount shall be determined by the State Engineer and/or the Provo River Commissioner.
3. Diversion, use and other matters of water management pursuant to the change application shall be under the direction and control of the State Engineer and/or the Provo River Commissioner.
4. The applicants shall at their own expense install and/or construct any measuring devices, controlling works or other equipment deemed necessary by the State Engineer and/or the Provo River Commissioner for proper administration of this change application.
5. When requested by the State Engineer, the applicants shall provide information to demonstrate that the operation plan is in place and that downstream rights are not being impaired and return flow patterns are being satisfactorily replicated.

6. The applicant shall provide such data regarding the replication of return flows, as requested by the Provo River Commissioner.
7. Any additional costs incurred by the Provo River Commissioner in the administration of the change application shall be borne by the applicants. The amount of such costs shall be determined by the Commissioner and/or the State Engineer.

This Decision is subject to the provisions of Rule R655-6-17 of the Division of Water Rights and to Sections 63-46b-13 and 73-3-14 of the Utah Code Annotated, 1953, which provide for filing either a Request for Reconsideration with the State Engineer or an appeal with the appropriate District Court. A Request for Reconsideration must be filed with the State Engineer within 20 days of the date of this Decision. However, a Request for Reconsideration is not a prerequisite to filing a court appeal. A court appeal must be filed within 30 days after the date of this Decision, or if a Request for Reconsideration has been filed, within 30 days after the date the Request for Reconsideration is denied. A Request for Reconsideration is considered denied when no action is taken 20 days after the Request is filed.

Dated this 3rd day of September, 1998.

Robert L. Morgan, P.E., State Engineer

RLM:JER:mt
